Aptera, a startup from California, hopes to finally start production of its solar-powered EV later this year with a starting price of \$40K. The three-wheeler achieves a claimed 400-mile range...

During CES 2025, Aptera shares that the dubbed first electric car covered with solar panels can offer drivers up to 400 miles of range from a single charge in under an hour. It can also ...

Described by onlookers as looking like a "spaceship", Aptera unveiled its production-ready solar electric vehicle at CES 2025 in Las Vegas, Nevada, earlier this month. The EV, which ...

How does Aptera Motors' solar electric vehicle work? Read on to learn all about this groundbreaking three-wheeled, solar-powered car.

At CES 2025, attendees got to ride in the most radical electric vehicle concept yet: a three-wheeled, solar-powered autocycle from California-based startup Aptera.

In a common bullet design, it can have 3 or 4 wheels, but is still many times more likely to tip over than a catamaran design, solely because it takes a significant amount of sideward G's for the ...

"Pickup truck drivers are beginning to deploy solar panels on their cab roofs and truck beds, and they're not just for electric trucks.

That said, the super-light carbon-fibre trike - designed to require fewer than one-tenth the parts of a traditional vehicle - can be juiced up at Tesla supercharging points and will be three times ...

At the heart of this innovative EV are 700-watt solar cells that provide up to 40 miles of range daily using just sunlight. When fully charged, the vehicle offers an impressive total range of...

Solar panels on 3 wheel electric vehicles are gaining popularity, but are they really worth the hype? Find out the benefits and limitations of this eco-friendly technology in our latest article.
