

Chinese government officials last month showed off what they say will be the world's largest solar farm when it is completed, high on a Tibetan plateau.

Like many of China's solar and wind farms, it was built in the relatively sparsely populated west. A major challenge is getting electricity to the population centers and factories in...

China has unveiled plans to build what it says will become the world's largest solar farm, a sprawling facility high on the Tibetan plateau covering 610 square kilometres - about the size of...

Chinese government officials last month showed off what they say will be the world's largest solar farm when completed high on a Tibetan plateau. It will cover 610 square kilometers (235 ...

High on the Tibetan Plateau, China is building the largest solar farm in the world, a project so vast it covers an area equal to the entire city of Chicago. The facility already produces power on a ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest hydroelectric dams.

In a remote stretch of the Tibetan Plateau, China is rapidly expanding what is now the world's largest solar park, a sprawling renewable energy complex that already covers an area more ...

China has transformed the "roof of the world" into a massive solar giant the size of Chicago; now experts report strange atmospheric and magnetic effects.
