

What is a street lighting cabinet?

Street lighting cabinets allow to control the time of switching on and off the lighting of streets, parks, squares or objects. Depending on the needs, we make systems based on simple astronomical clocks as well as modern solutions using GPS, GPRS, GSM technologies.

Do street lights share a powerline?

When it comes to street lighting, it is generally the case that groups of streetlights share a common powerline. These street lights can either communicate with each other or communicate with gateways leading to supervisory control systems.

What is street lighting control?

The idea of street lighting control appeared long ago, from the struggle of managing large numbers of lamps. A solution was needed so that the lamps could be clustered in smaller numbers and handled more efficiently in terms of powering on and off, power outages, maintenance etc.

Can a street lighting circuit be attached to a tripping circuit?

be attached to the street lighting circuit. This may result in nuisance tripping, which may in turn re ction/selection of client protective devices The designer must select protective devices for the installation in accordance with the performance requirements of BS 7671. These are usually a fu
