

The US is investigating solar power generation issues

As the United States leans on solar power to meet soaring energy needs, its reliance on a Chinese-made component has created a mounting security threat, according to energy industry...

These developments in solar industry conditions and policies have affected U.S. manufacturing capacity, solar PV installations, component imports, and workforce needs. Solar PV manufacturing has five main stages: ...

Despite the Trump administration's wide-ranging attacks on renewables like wind and solar power, the clean-energy industry is on pace for record growth this year, according to government...

In our US solar market insight Q2 2025 report, created in collaboration with the Solar Energy Industries Association (SEIA), we dive into the federal policy headwinds and trade-action whirlwind and how ...

The extra layer of scrutiny for wind and solar contrasts with actions by the Trump administration to make it easier and cheaper for companies to produce oil, coal, gas and nuclear power.

The Energy Information Administration, in its Short-Term Energy Outlook, is predicting a slowdown in the deployment of solar capacity in the United States, even before the Trump administration ...

SEIA has released a report saying that political attacks are threatening 500 US solar and energy storage projects totaling nearly 116 GW of capacity, or about half of all planned capacity...

More than 20 states sued the EPA on Thursday, challenging its cancelation of a \$7 billion program that aimed to make solar power accessible to low-income households.

US solar added 18 GW in early 2025, but Trump policies could slash growth by 55 GW by 2030, raising costs and risks, says a new SEIA report.

Delays in solar project schedules tend to be relatively short in duration, and reports of delays are more common than cancellations: less than 1% of planned solar capacity is entirely cancelled in a typical ...
