

Pour répondre à ces objectifs une plateforme dédiée par MICROGRID Platform (MGP) a été développée ; l'Ecole Nationale d'Ingénieurs de Tunis. Elle regroupe des éléments de gestion ...

The U.S. Department of Energy commissioned the National Renewable Energy Laboratory to complete a microgrid cost study and develop a microgrid cost model. The goal is to elucidate the variables that ...

Aligned with the Government's updated Energy Transition Strategy, TEREK aims to strengthen STEG's operational and financial performance, attract private investment, and lower the ...

This study presents an optimization approach for sizing photovoltaic (PV) and battery energy storage systems (BESSs) within a DC microgrid, aiming to enhance cost-effectiveness, energy ...

The Commercial and Industrial (C& I) microgrid market is experiencing robust growth, driven by increasing electricity costs, unreliable grid infrastructure, and the rising adoption of ...

It's still early days on what already feels like a long road, but the movement to create a multi-customer microgrid utility for Cuyahoga County, Ohio, moved a huge step forward earlier this ...

The program will consist of two phases: During the first phase (2022-2025), the project has begun to deploy the smart grid network in a pilot region covering Sfax city and Kerkennah, ...

La Tunisie s'est engagée dans une transition énergétique visant à multiplier par 10 la contribution des énergies renouvelables en 12 ans. Cette évolution impose de mettre en place une approche de type ...

This initiative is part of the demonstration and implementation activities of the Med-EcoSuRe project and aims, through the acquisition of innovative technologies, to strengthen research and capacity within ...

For example, the PEGASUS project, funded under the Interreg MED program, was presented, which aims to implement a set of tools and measures to facilitate the development of microgrids.
