

This map provides information about all of the solar photovoltaic (PV) manufacturing facilities in the United States and how they contribute to the solar supply chain.

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

If you're considering purchasing solar panels and are hoping to do so from an American solar panel manufacturer, learn all about US solar panel manufacturers.

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

Solar energy is a great way to cut down on power costs. In this article, we share the best American made solar panels across a wide range of price points.

The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Canadian Solar, Illuminate USA, and T1 Energy. These companies produce high-performance solar panels for residential, ...

Explore the leading US manufacturers of solar panels. Learn about the companies driving the growth of solar energy and their impact on the renewable energy sector.

We've rated thousands of solar panels made by dozens of manufacturers based on efficiency, power output, warranty, and other important specs that allow each panel to make the most ...

A current list of U.S. solar panel manufacturers that produce solar panels for the traditional American residential, commercial and utility-scale markets.

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...
