

Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead of expected ...

The National Energy and Utilities Regulatory Commission of Ukraine (NEURC) has approved the connection of a 3.8 MW solar plant, integrated with a 6.9 MWh energy storage system, ...

The Solar Energy Association of Ukraine estimates around 1.5 GW of solar was added in the country last year, driven by growing interest in projects co-located with battery energy storage ...

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

The Solar Energy Association of Ukraine estimates around 1.5 GW of solar was added in the country last year, driven by growing interest in projects co-located with battery energy storage...

Choosing solar power with battery storage for water supply and social infrastructure facilities is a strategic decision in the context of war and climate change. Unlike diesel generators, ...

This comprehensive analysis delves into the core drivers, technical solutions, and strategic pathways for deploying resilient solar-plus-storage systems across Ukraine, providing a ...

Across Ukrainian households, agricultural operations, emergency shelters, and telecom stations, the shift toward solar + battery backup is helping restore energy security, reduce diesel ...

DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation spans six sites ranging ...

In just six months -- under shelling, blackouts, and wartime restrictions -- Ukraine completed Eastern Europe's largest battery storage project: 200 megawatts / 400 megawatt-hours of ...
