

Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Summary: Discover how Budapest's groundbreaking 5GWh energy storage battery project is reshaping renewable energy integration, stabilizing power grids, and supporting Hungary's green transition. ...

Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in ...

This summit is recognized as the only international meetup focused on utility-scale solar and energy storage in Hungary. Participants will engage in discussions about critical topics such as ...

Electric utility company E.ON is building a new battery energy storage facility in Soroksár (part of Budapest), which will enable the connection of new solar systems and increase security of ...

With a nominal output of 40 MW and a storage capacity of 80 MWh, the facility marks the latest in a series of energy storage investments by MET Group across Europe.

Both the energy storage unit and the gas engines play an important role in the regulation of the electricity system through the ALTEO Virtual Power Plant. The gas engines - in parallel - ...

Hungary's renewable energy sector is witnessing a landmark project: the Budapest Energy Storage Photovoltaic Initiative. This article breaks down the construction sequence of this cutting-edge project ...

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a ...

The company recently acquired French battery storage developer Comax and is expanding its portfolio of co-located battery and solar energy facilities. With operations in 17 ...
