Are off-grid solar systems a viable option in Australia?

As the world continues prioritising sustainability and renewable energy sources, off-grid solar systems have emerged as an attractive option for homeowners and businesses in Australia. These systems allow consumers to independently generate clean, renewable energy, reducing reliance on traditional fossil fuels and power grid networks.

How much does an off-grid solar system cost?

However, off-grid solar systems are generally more expensive than grid-tied systems. How much does an off-grid solar system cost in 2025? According to our Energy Matters team, the average cost of an off-grid solar system for a two--to three-person home is around \$20,000--\$35,000. The greatest expense is the battery.

What is an off-grid Solar System?

Off grid, standalone, or autonomous solar systems are self-contained power systems that do not rely on the centralised electrical grid. Instead, solar panels harness energy from the sun through photovoltaic (PV) panels, store it in batteries, and use inverters to convert it into usable electricity.

Are off grid solar systems a good investment?

Off grid solar systems are a promising solution for Australians seeking energy independence and sustainable living. Although the initial cost may present a hurdle, the long-term benefits, including reduced energy bills and environmental impact, make them an attractive investment.
