

Wind-resistant solar-powered container for water plants

LZY Solar Containers use proprietary folding panel technology to maximize power generation while maintaining standard shipping dimensions. Our systems are faster to deploy, generate more power ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Our line of solar transportable power units (TMSPDC™; Power AnyWhere Any Time™;) provides stand-alone photovoltaic power. These portable units supply AC power just about anywhere the sun shines.

At its core, a solar power container is a mobile solar power station engineered inside a standard ISO shipping container. The structure is rugged, transportable, and weather-resistant, ...

OSMO-WATT™; is a solar container, with autonomous production from a single 20ft container using solar energy for a drinking water production ranging between 5 to 100m³ per day.

Engineered to support both wind and solar energy, this outdoor system offers a high-capacity storage of up to 5 MWh, making it ideal for large-scale energy needs. Equipped with advanced liquid cooling ...

We make mobile solar containers easy to transport, install and use. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever.

Our containerized energy solution offers notable economic and practical advantages:

We design and sell foldable and unfoldable solar trailers, quiet, with no maintenance, non polluting, adjustable & orientable and 20-foot maritime containers including vertical aluminium sliding and ...

The containerized format provides a complete, self-contained power plant that deploys quickly, operates autonomously, and withstands harsh environments including extreme cold down to -40°C.
